	E-waste monitoring for the Western Balkans	Within the framework of the Global E-waste Statistics Partnership, this project aims to make an assessment of e-waste statistics, e-waste management practices and the e-waste legislation landscape in the beneficiary countries, including North Macedonia, to produce the Regional E-waste Monitor report for the Western Balkans. Building upon the results of the assessment, capacity development activities will be provided. This will include the elaboration of a country profile, training and national workshop raising awareness on the topic of e-waste. Measuring e-waste volumes is an important step towards addressing the e-waste challenge. Statistics help to evaluate developments over time, and set and assess targets, and policies. Better e-waste data can help governments to prevent illegal dumping, promote recycling, and create jobs in the reuse, refurbishment, and recycling sectors.	11/1/2021	6/30/2023	Pipeline	ITU; UNEP; UNITAR	ITU; UNEP; UNITAR	ITU; UNEP; UNITAR	$16,500	$16,500	12.4, 12.5	12	Whole country	-	-	-	None of the listed groups
